Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 9-13, 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Gyory et al., US No. 3,671,048 ("Gyory").

Gyory discloses a seal (Fig. 4) comprising a sealing element. The sealing element is fitted with a sealing surface (21). The sealing element is provided with a facing including a non-woven material impregnated with at least one polymer dispersion (col. 3, lines 6-7).

The facing forms the sealing surface (Fig. 4). The facing is disposed on a surface of the sealing element and is oriented toward an outside of the sealing element (Fig. 4).

The seal comprises a stiffening ring (20). One layer of the nonwoven material is impregnated with PTFE dispersion (i.e. the PTFE fibers).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3676

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-8 and 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gyory in view of Petrak, US No. 5,655,781 ("Petrak").

Gyory does not disclose the seal having a dust lip and a spring element provided thereon. Petrak discloses such an arrangement in order to provide an effective seal.

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify Gyory as taught by Petrak in order to provide an effective seal.
